Developer - Temporary (6 months)

Job Title:	Developer	**Reference Number:**	118080
Location:	North Vancouver	**Employment Type:**	Temporary Full Time
Hours of Work:	7.5 hr Day Shift (M-F)	**Posted Date:**	2023/10/11

Position Highlights

ICBC is committed to delivering consistently high-quality customer service to all British Columbians. If you are reliable and dependable, we welcome you to apply for this exciting opportunity.

The Information Services Division is currently looking for a Developer to join our applications team on a Temporary assignment for 6 months. In this position, you will take on the integral role of enhancing and maintaining the online tools our teams, partners and customers use on a daily basis. You will have a chance to use your skills in the areas of web and application development; testing; deployment and operational support.

As a Developer, you will be responsible for:
• Coding and unit testing in support of minor enhancements and internal improvement initiatives.
• Providing technical expertise while managing and leading low to medium complexity work for the design, configuration, development, and delivery of software applications.
• Providing technical expertise while managing components of work for the design, configuration, development, and delivery of software applications.
• Generating and maintaining accurate application, design and support documentation.
• Investigation and resolution of production problems related to the applications.
• Providing estimates for business cases, impact assessments, projects and action requests in response to requests from Business Systems Analysts or Team Leads.
• Develop automation methods, identify performance and system capacity requirements, and implement development tools to gain efficiencies with application development and operational support.
• Actively participate in Agile, peer review and other best practices within departments SDLC procedures.

Position Requirements

This position will require someone who has 2+ years of hands-on experience in the domain of software development or equivalent post-secondary education in Computer Science.

The ideal candidate will possess the following qualifications:
• Hands-on experience in Java/C#/C++, JavaScript / Angular, SQL/Oracle, XML, version control tools (e.g. SVN, GitLab) and full stack web development.
• Hands-on experience with the Java Spring Framework (Spring, SpringBoot, Spring Security, Spring Cloud Gateway).
• Hands on experience with unit testing/functional testing and application debugging techniques.
• Familiarity with Enterprise Architecture concepts including web services, queues, sync/async.
• Exposure to Agile methodologies, or other software development best practices preferable.
• Able to understand functional/non-functional requirements.
• Effective written and oral communication skills.
• Ability to work independently and in a cross-functional team environment.
• Demonstrated critical thinking, problem solving and learning agility.
• Ability to plan, prioritize and complete multiple concurrent tasks in an environment of changing deadlines, priorities and requirements.
• Exposure to Continuous Integration & Delivery, Mobile application development would be an asset.
• Exposure to Kubernetes (OpenShift, Rancher, Ubuntu, Cloud (GKE, AKS), Docker, and Linux would be an asset.

Position Information
• We offer flexible working arrangements as we continue to support our employees in balancing their career and family commitments.
• Engaging Culture: We promote an inclusive and diverse work environment.

Only candidates legally entitled to work in Canada will be considered for this position.

Please note only those legally entitled to work in Canada at present will be considered for this position.
